PROFESSIONAL SUMMARY

Detail-oriented and innovative Full Stack Developer with hands-on experience building full-stack applications using MongoDB, Express.js, React.js, and Node.js Seeking the Full time Opportunity. Strong command of RESTful API development, database design, cloud deployment, and modern front-end frameworks. Skilled in Agile development, CI/CD workflows, and secure application development including RBAC concepts. Adept at translating business requirements into scalable technical solutions. Experience building scalable React and Node.js applications with RESTful APIs and modern frontend engineering architecture.

CORE TECHNICAL SKILLS

- Frontend: React.js, React Bits, Tailwind, TypeScript, Bootstrap, Responsive UI/UX
- Backend: Node.js, Express.js, Microservices-ready REST APIs, Authentication (JWT)
- Databases: MongoDB, MySQL, SQL, Mongoose
- Tools: Git, GitHub, Docker, Postman, ThunderClient, Linux Basics
- Cloud: AWS (EC2, S3 basics), Render, Netlify
- Other: Application Performance Optimization, Debugging & Troubleshooting, Excel automation (Pivot Tables, VLOOKUP, Macros), Agile / Scrum

---

RELEVANT PROJECTS

Royal Threads E-Commerce Website (MERN)

GitHub repository- https://github.com/Rahim023/RoyalThreads_project.git

- Developed full-stack e-commerce platform with product catalog, shopping cart, and authentication.

- Implemented secure REST APIs, JWT access control, and category-based management.
- Integrated image hosting, auto-scrolling product sections, and optimized UI components.
- Collaborated with UI/UX design concepts and backend logic using GitHub and Agile workflows.

Discussion Board System (MERN)

GitHub repository- https://github.com/Rahim023/Discussion_board.git

- Developed discussion forum enabling posts, comments, and permissions.
- Implemented CRUD APIs, JWT authentication, and secure route handling.
- Designed scalable MongoDB schemas.

Portfolio Website

Deployed Link: Rahim-Portfolio

- Developed responsive personal portfolio using React.js and Bootstrap.
- Added animations, contact forms, and grid-based design.

WORK EXPERIENCE

S.K Boutique — Customer & Operations Assistant (09/2022 – 04/2024) • Applied logical workflows and data structuring similar to backend system design.

• Designed digital portfolio and store management tools.

• Handled customer interactions and improved satisfaction.

• Automated repetitive tasks, reducing workload by 40%.

EDUCATION

Computer Programming Diploma — Sault College, Toronto (May 2023 –Dec 2025)

Relevant Coursework: Full-stack Development, Cloud Deployment, Database

Management, UI/UX, E-Commerce Systems

ADDITIONAL QUALIFICATIONS

- Strong problem-solving and debugging skills
- Experience in consulting with team by using Agile (Scrum, Stand-ups, Sprint Planning)
- Familiar with CI/CD pipelines and GitHub Actions
